Notes About This Deck

- Free to use and modify for your own training
- Spread the love about Prompt Engineering
- Most prompts +results are created with ChatGPT 5.3, but given the nature of AI models, you may not be able to replicate the same results

What Is Prompt Engineering?

Andrej Karpathy ✓

@karpathy

The hottest new programming language is English

12:14 PM · Jan 24, 2023 · **3.8M** Views

Let's Ask ChatGPT

what is prompt engineering?

Prompt engineering is the practice of **carefully designing the instructions (prompts)** you give to an AI so it produces **better, more accurate, and more useful outputs**.

Think of it as learning how to *talk to AI clearly and strategically*.

In plain terms

Instead of saying:

“Write about climate change”

A prompt-engineered version might be:

“Write a 200-word, neutral summary of the main causes of climate change, aimed at GCSE-level students, using simple language and one example.”

Same AI. Much better result.

Your Prompt Can Be Simple...

Ready when you are.

A horizontal chat input field with rounded ends. On the left is a plus sign icon. Next to it is the text "hello!". On the right side of the field are two icons: a microphone icon and a black circular button with a white upward-pointing arrow.

This is your **simple** prompt

... Or It Can Be Complex

Where should we begin?

Summarize the following report into a short one paragraph update to the principal:

Overseas Educational Trip Report

School XYZ organized an overseas educational trip to England with the objective of providing students with international exposure, cultural enrichment, and experiential learning opportunities. The trip combined academic visits, historical exploration, and cultural activities, allowing students to deepen their understanding of British history, society, and education while developing independence and global

This is your **more complex prompt**

So What Is A Good Prompt?

A good prompt is what gets you to the desired answer the fastest.

AI Models

Tokens Is The New Currency Of AI

You type: **I love Singapore's hawker food!**

5 words
31 characters

AI sees:

I love Singapore's hawker food!

8 tokens

In general, 100 tokens $\approx$ 75 words

Hands-on

Explore Tokenizer

Go to

<https://platform.openai.com/tokenizer>

and try out how the AI tokenizes your
English sentences

AI Is Multi-modal

- ChatGPT started off leveraging on **Large Language Models (LLMs)** which can do text generation.
- But now, many of the latest AI applications from OpenAI and Google allow you to generate not just text, but also images and videos

Hands-on

Image Generation

Go to

<https://chat.com>

and generate an image that will best represent you engaging in your interests & hobbies.

Tip: Generate an image of a girl on a bicycle ...

Sample Prompt

"Generate an image of a young man, center parting straight hair, wearing a black Tshirt, blue jeans, playing a game on a laptop. Game is showing a Diablo-like game, Action RPG. Left hand on keyboard, right hand on mouse. Next to him is a cup of tea, piping hot. Studio Ghibli style."

Hallucination

How AI works and how it can get confused

How AI Models Work *In General*

Learn patterns from
large datasets

Use those patterns
to make predictions

Generate outputs
based on new
unseen input

Learn patterns from large datasets

AI models are trained on massive amounts of data (text, images, audio, etc.) to identify patterns and relationships.

Example: A language model learns grammar, vocabulary, and common phrases from billions of text samples.

Use those
patterns to
make
predictions

Instead of “understanding” like humans, AI predicts the most likely output based on what it has learned.

Example: When you type a prompt into an AI chatbot, it predicts the next most likely word to form a response.

Generate
outputs
based on
new
unseen
input

Recipe

1. Preheat the oven to 375°F.
2. Combine flour, sugar, and eggs.
3. Mix until smooth.
4. Bake for 25 minutes.

Once trained, the AI model can create new content based on new inputs, even if it has not seen them before.

Examples: Chatbots generating answers to new questions; AI generating images from text prompts

Hallucinations & Mistakes

- The problem with these AI models is that they appear very confident, even when its output is actually factually wrong
- When that happens, we call this *hallucination*.
- This can get serious when it is used in court cases, and official documents.
- While newly released LLMs have reduction in hallucination rates, some areas where it still might hallucinate are:
 1. Reasoning hallucination (e.g. complex math / programming questions)
 2. Fabricated citations / citations that have been taken out of context
 3. Specialised / case-specific information

Examples of Problems Caused By AI Hallucination

SINGAPORE – A lawyer has been ordered to pay \$800 to his client’s opponent in a civil suit after a non-existent case generated by an artificial intelligence (AI) tool was found in his court documents.

Mr Lalwani Anil Mangan of DL Law Corporation said the non-existent case was originally cited by his junior lawyer, who would have run the case through an AI app.

[Lawyer ordered to pay client’s opponent \\$800 after discovery of fake case created by AI | The Straits Times](#)

Rudge said he found up to 20 errors in the first version of the report.

The first error that jumped out at him wrongly stated that Lisa Burton Crawford, a Sydney University professor of public and constitutional law, had written a non-existent book with a title suggesting it was outside her field of expertise.

“I instantaneously knew it was either hallucinated by AI or the world’s best kept secret because I’d never heard of the book and it sounded preposterous,” Rudge said.

[Deloitte to partially refund Australian government for report with apparent AI-generated errors - CNA](#)

Mistakes That AI Can Make

It may get some parts of the responses correct, but some parts wrong. Yet the AI often sounds very confident.

Name 5 countries that start and end with the same letter.

Here are five countries whose names start and end with the same letter:

1. Albania — starts with A and ends with A
2. Algeria — starts with A and ends with A
3. Angola — starts with A and ends with A
4. Argentina — starts with A and ends with A
5. Australia — starts with A and ends with A

These are
correct ...

There are actually **many more** countries that meet this condition (for example Canada, Cuba, Malta, India, and Panama). If you want, I can also list **all of them**. 🌍

... but these
are wrong.

Mistakes That AI Can Make

It may sometimes solve very complex Maths problems, but it can also get simple counting wrong.

Output a poem about Singapore with only 20 words

Island city rising bright,
Gardens bloom beside tall glass,
Merlion watches restless seas,
Cultures mingle, hawker smoke drifts,
Singapore shines through humid nights.

**There are 23
words here**

Go to

<https://chat.com>

and try asking the AI some questions and find examples of it hallucinating. Try asking it questions about facts that you know and can verify.

Note: Now that ChatGPT has access to web search, it hallucinates less, but never trust it completely. Always verify the output of the AI.

Hands-on

Hunt for a hallucination example

Controlling The Output

Zero Shot, One Shot, Few Shots

Zero Shot, One Shot, Few Shots

- When the format of the output is unspecified, the AI decides on its own what is the best way to show it.
- We can better control it by showing it some examples:
 - **Few-shot learning** happens when we provide the model with several examples. From those examples, the model can pick up the pattern and apply it to a new case.
 - **One-shot learning** is similar, except we give the model just a single example to work from.
 - **Zero-shot learning** is where we simply ask the question without giving the AI any examples at all.

Zero Shot

"Alan was extremely patient with me when I needed help with Maths. With his guidance, I scored very well for my exams."

Rate whether this is a positive or negative comment.

This is a **positive** comment. 😊

Why:

- It praises **Alan's patience**.
- It says **his guidance helped the student score very well** in exams.

So the overall sentiment is **positive**.

**Verbose output
decided by the AI**

Few Shots

Examples given

Output accordingly:

Feedback: "Alan was extremely patient with me. With his guidance, I scored very well for my exams."

Comment: Positive

Feedback: "Susan shouldn't be a tutor at all. She loses her temper easily when I ask her a second time."

Comment: Negative

Feedback: "James deserve a promotion! He makes sure I understand all the concepts before ending the class each time"

Comment: ???

Feedback: "James deserve a promotion! He makes sure I understand all the concepts before ending the class each time"

Comment: **Positive**

Output as per
your examples

Few Shots

A: Merlion, Marina Bay Sands, Hawker Centres

B: Singapore

A: Great Wall, Pandas, Forbidden City

B: China

A: Pyramids, Obelisks, Hieroglyphs

B:

A: Pyramids, Obelisks, Hieroglyphs

B: Egypt 🏺

Output as per your
examples, even without
knowing what you
mean by A and B.

Hands-on

Using Few Shots Prompting

Using **Few Shots prompting**, get the AI to output the following in response when you give it the title of a common Children's Story.

The Tortoise and the Hare

The Tortoise and the Hare

Key Characters: Tortoise, Hare

One-Line Summary: A slow but determined tortoise wins a race against a fast but overconfident hare who stops to rest and loses.

Using Few Shots Prompting, get the AI to output the following in response when you give it the title of a common Children's Story.

The Tortoise and the Hare

The Tortoise and the Hare

Key Characters: Tortoise, Hare

One-Line Summary: A slow but steady tortoise wins a race against a fast hare who becomes too confident and stops paying attention.

Using Few Shots Prompting, get the AI to output the following in response when you give it the title of a common Children's Story.

Three Little Pigs

Key Characters: First Pig, Second Pig, Third Pig, Wolf

One-Line Summary: Three little pigs build houses of different materials, and only the pig who builds a strong brick house stays safe from the wolf.

Little Red Riding Hood

Key Characters: Little Red Riding Hood, the Wolf, Grandmother, Woodcutter (or Hunter)

One-Line Summary: A young girl on her way to visit her grandmother meets a cunning wolf who tricks her and tries to eat them both, but help arrives just in time to save them.

The Tortoise and the Hare

The Tortoise and the Hare

Key Characters: Tortoise, Hare

One-Line Summary: A slow but steady tortoise wins a race against a fast hare who becomes too confident and stops paying attention.

CO-STAR

The AI is your co-star because
you are the star!

What Is CO-STAR?

- CO-STAR is a framework (out of many other frameworks) you can adopt to help you write your prompts better.
- It provides a comprehensive way to think about what you should include in your prompts to achieve the output you need.
- Most of the time, for casual interaction with AI like ChatGPT, we will just type our questions and iterate along.

CO-STAR - Context

C is for **C**ontext

Provide **clear background information** to help the AI understand what you are asking about. This might include the background behind your request, details about the situation, or any relevant information.

The more context you give, the easier it is for the AI to pick out relevant information from what it was trained on.

CO-STAR - Context

Write a short new year greeting

Message

Happy New Year! 🎉

Wishing you a year filled with happiness, good health, and success. May the coming year bring new opportunities, wonderful moments, and plenty of reasons to smile. 🌟

Write a short new year greeting for 2026 for my neighbour

Message

Happy New Year 2026! 🎉

Wishing you and your family a wonderful year ahead filled with happiness, good health, and many joyful moments. It's lovely having such great neighbours. All the best for the year ahead!

CO-STAR - Objective

○ is for ○bjective

Clearly state the goal of your prompt and what you expect the AI to do.

For example, you might want the AI to answer a question, generate ideas, or summarise a long text.

Being specific about the objective helps the AI get right to work.

CO-STAR - Objective

Learning English is difficult.

Learning English can feel difficult, but it gets easier with practice. 🌟 Many people find it challenging at first because of grammar rules, vocabulary, and pronunciation. The key is to practise a little every day—read short texts, write simple sentences, listen to English, and speak whenever you can. Over time, your confidence and skills will improve. Keep going, and don't be afraid to make mistakes—they are part of learning! 📖

Help me practice with some
Vocabulary questions for my English test next week.

Great idea to practise vocabulary before your test! 📖 Let's try a few questions.

Part 1: Choose the Correct Meaning

Choose the word that has the **closest meaning**.

1. The word “**rapid**” means:

A. slow

CO-STAR - Style

S is for **S**tyle

Specify the **style you want the response to be written in**. This helps guide the how the output will look like.

For example, you might ask the output to be written in the style of a job role (e.g. a comedian) or mimic the style of a famous celebrity.

Clear style guidance helps the AI tailor the choice of the words it outputs.

CO-STAR – Style

Generate a short speech to motivate my peers to complete the trek up the mountain

Friends,

We have come a long way already. Look back down the trail for a moment and see how far our steps have carried us. Every stretch of steep ground, every moment when our legs felt heavy, has brought us closer to the summit we set out to reach together.

Right now the path ahead may seem demanding. The air is thinner, the slope is steeper, and it might feel tempting to slow down or turn back. But this is the point in every journey where determination matters most. The summit is not reached by the strongest person alone, but by those who keep moving forward, step by step, even when the climb becomes difficult.

Remember why we started. We wanted the challenge. We wanted the view that only those who persevere get to see. Up there, above the clouds, we will stand together knowing that every drop of effort was worthwhile.

So take a breath, lift your head, and keep going. Encourage the person beside you, because we are not climbing as individuals — we are climbing as a team. The summit is closer than it feels, and every step we take now brings us nearer to that moment when we can look out across the world and say, *we did it together*.

Let's keep climbing.

A generic response when not asked to output in any style

CO-STAR – Style

Generate a short speech in the style
of Lee Kuan Yew to motivate my
peers to complete the trek up the
mountain

Friends,

Let us be clear about something. Mountains are not conquered by wishful thinking. They are conquered by effort, by endurance, and by the simple decision not to give up when the climb becomes uncomfortable.

We have already come a considerable distance. That did not happen by accident. It happened because each of us took one step after another, even when the path was steep. The summit is not reserved for those who complain about the climb. It belongs to those who persist.

Now we face the hardest stretch. That is always the case in any worthwhile endeavour. But difficulty is not a signal to retreat; it is a test of our resolve. If we keep our discipline, support one another, and press forward steadily, the summit will come.

So do not look at the mountain and think about how far remains. Look at your next step. Then the one after that. Do that together, and before long we will stand at the top.

Now—let us continue the climb.

← A response
mimicking the
style of LKY

CO-STAR – Style

Generate a short speech in the style
of a Doctor to motivate my peers to
complete the trek up the mountain

Friends,

Let me speak to you as a doctor for a moment. Right now your heart is beating faster, your lungs are working harder, and your muscles may be complaining. But what you are feeling is not failure — it is your body doing exactly what it was designed to do: adapt, endure, and grow stronger under challenge.

Every step up this mountain is like a small dose of training for your body and your mind. Your heart becomes stronger, your lungs more efficient, and your resilience sharper. When you feel tired, that is simply your body asking you to breathe steadily, pace yourself, and keep going.

Remember, progress in medicine — and in life — rarely comes in sudden leaps. It comes in small, consistent steps. One careful step after another. Hydrate, breathe deeply, support the person next to you, and maintain a steady rhythm.

The summit is not just a place at the top of the mountain. It is proof that your body and your willpower can work together to overcome difficulty.

So take a breath, check your footing, and let's continue the climb — one healthy step at a time.

← A response
mimicking the
style of a doctor

Hands-on

Practice Different Styles

Try and see the difference in output when you adopt different styles such as:

- Career Coach
- Tech Expert
- CEO
- Teacher
- Comedian

Hands-on

What style
do you
need to
generate
something
like this?

Hey everyone,

People think heroes are made by superpowers, but real heroes are made by effort.

Every time you study when you feel lazy, every time you try again after failing, every time you don't give up — that's hero training.

I mess up all the time, but I learned something important: heroes don't quit when things get hard.

With great power comes great responsibility, and your power right now is your future.

Every lesson you learn makes you stronger for what's ahead.

So when studying feels boring or difficult, remember — heroes are made in tough moments, not easy ones.

Keep studying. Keep trying. Keep going.

Your story is just beginning, and the hero of that story is you.

What style do you need to generate something like this?

Hey everyone,

People think heroes are made by superpowers, but real heroes are made by effort.

Every time you study when you feel lazy, every time you try again after failing, every time you don't give up, that's hero training.

I mess up all the time, but heroes don't quit.

With persistence,

Even when it's ahead,

So when studying feels boring or difficult, remember — heroes are made in tough moments, not easy ones.

Keep studying. Keep trying. Keep going.

Your story is just beginning, and the hero of that story is you.

Write a speech to inspire the students in the school to study hard in the style of Spiderman

CO-STAR - Tone

T is for **T**one

Indicate the **tone you would like the response to convey**.

Tone reflects the emotional feel of the writing, such as whether it should be casual, professional, encouraging, or humorous.

Choosing an appropriate tone helps ensure the response connects well with the intended audience, especially when creating content such as speeches, messages, or presentations.

CO-STAR - Tone

Explain why we should not feed pigeons in 1 paragraph.

Feeding pigeons may seem harmless, but it can cause several problems for both people and the environment. When pigeons are regularly fed, their population can grow beyond what the natural environment can support, leading to overcrowding. Large numbers of pigeons produce significant amounts of droppings, which can damage buildings, create unpleasant public spaces, and potentially spread diseases. Feeding also encourages pigeons to depend on human food rather than searching for natural sources, which can disrupt the ecological balance. For these reasons, avoiding feeding pigeons helps keep urban areas cleaner, healthier, and more balanced for both wildlife and people.

Explain why we should not feed pigeons in a humorous tone in 1 paragraph.

Feeding pigeons might feel like a kind and generous act, but to a pigeon it's basically the equivalent of receiving a never-ending buffet invitation — and pigeons are terrible at declining free food. Once they realise snacks are available, they will summon all their relatives, friends, and possibly the entire pigeon extended family tree to the same spot. Before long, you are no longer feeding a bird; you are hosting a feathery convention complete with noisy delegates and an alarming amount of "aerial decorations" falling from above. By not feeding them, you help keep their numbers sensible, the pavements cleaner, and yourself from becoming the unofficial manager of the local pigeon restaurant. 🐦

Hands-on

Practise Different Tones

Try and see the difference in output when you adopt different tones such as:

- Formal
- Casual
- Melancholic
- Empathetic
- Professional
- Authoritative

CO-STAR - Audience

A is for **A**udience

Specify **who the response is intended for**.

Saying that it is a general audience may allow the AI to provide more neutral responses, but it may not resonate as well.

But specifying who the output is meant for (e.g. young children, teenagers or professionals) will help the AI choose the right level of language, examples, and explanations.

CO-STAR - Audience

Help me practice with some Vocabulary questions for my English test next week.

Great idea to practise vocabulary before your test! 📅 Let's try a few questions.

Part 1: Choose the Correct Meaning

Choose the word that has the **closest meaning**.

1. The word "**rapid**" means:

A. slow

B. fast

Help me practice with some Vocabulary questions for my English test next week. Pitch it at a Primary 1 level in Singapore.

Great! Let's practise some **easy vocabulary questions**. Read each question and choose the **correct answer**. ✎

Part 1: Choose the Correct Word

1. The sun is very ____.

A. hot

B. cold

C. wet

CO-STAR - Audience

Help me practice with some Vocabulary questions for my English test next week.

Help me practice with some Vocabulary questions for my English test next week. Pitch it at an Expert level in Singapore.

Great idea to practise vocabulary before your test! 🎨 Let's try a few questions.

Part 1: Choose the Correct Meaning

Choose the word that has the **closest meaning**.

1. The word "**rapid**" means:

A. slow

Part 1 — Contextual Vocabulary

1. The minister's speech was criticised for being overly ***equivocal***, leaving voters unsure of his actual stance on the policy.

- A. passionate
- B. ambiguous
- C. decisive
- D. confrontational

2. The scientist's theory was initially dismissed as ***specious***, appearing convincing but lacking genuine substance.

- A. superficial yet persuasive
- B. overly complicated
- C. morally offensive
- D. highly innovative

CO-STAR - Response

R is for **R**esponse

Specify how you would like the **response to be structured**.

Indicate whether you want a succinct answer or a more detailed explanation, and describe the format that would be most helpful, such as paragraphs, bullet points, numbered steps, or a table.

Providing guidance on the length and format helps the AI present the information in a way that is easier for you to read and use.

CO-STAR - Response

What is AI? Output as a short
succinct paragraph.

Artificial intelligence (AI) refers to computer systems designed to perform tasks that normally require human intelligence, such as recognising patterns, understanding language, solving problems, and making decisions. These systems use algorithms and data to learn from experience, allowing them to improve their performance over time. AI is used in many areas of daily life, including voice assistants, recommendation systems, medical analysis, and autonomous technologies.

What is AI? Output as 5 bullet
points.

- **Artificial Intelligence (AI)** refers to computer systems designed to perform tasks that typically require human intelligence.
- It enables machines to **learn from data, recognise patterns, and make decisions.**
- AI systems often use techniques such as **machine learning, neural networks, and natural language processing.**
- It is widely used in applications like **voice assistants, recommendation systems, medical diagnostics, and self-driving technology.**
- The goal of AI is to **improve efficiency, automate complex tasks, and assist humans in solving problems.**

CO-STAR - Response

What is AI? Output in a table format
with the columns: Categories of AI,
Key Points, Examples

Categories of AI	Key Points	Examples
Narrow AI (Weak AI)	Designed to perform a specific task efficiently; cannot operate outside its programmed function.	Voice assistants, recommendation systems, spam filters
General AI	A theoretical form of AI that would be able to perform any intellectual task a human can do.	Human-level intelligent machines (currently not achieved)
Machine Learning	AI systems that learn patterns from data and improve performance over time without explicit programming.	Fraud detection systems, movie recommendations
Natural Language Processing	Enables computers to understand, interpret, and generate human language.	Chatbots, translation tools, virtual assistants
Computer Vision	Allows machines to interpret and analyse visual information such as images and videos.	Facial recognition, medical image analysis, autonomous vehicles

Output Format

- Some common output formats you can consider:
 - Markdown Format (See <https://www.datacamp.com/cheat-sheet/markdown-cheat-sheet-23> for more info)
 - JSON Format (This is useful for developers)
 - Table Format
 - Bullet points
 - ... in 3 paragraphs
 - ... succinctly (will instruct AI to shorten it)

Hands-on

Generate an MCQ set of questions

Write the prompts to generate the following output of a Vocabulary test.

The committee rejected the proposal because they believed the evidence supporting it was **spurious**.

- A - Genuine and reliable
- B - False but presented as if it were true
- C - Difficult to understand
- D - Widely accepted by experts

Correct Answer: B

Despite the tense negotiations, the diplomat remained **placid**, refusing to let the situation provoke anger or panic.

- A - Calm and undisturbed
- B - Aggressive and confrontational
- C - Confused and uncertain
- D - Energetic and enthusiastic

Correct Answer: A

Hands-on

Practise A Full CO-STAR Prompt

#CONTEXT

There is a Singapore songwriting competition for the National Day Song of 2026. I am taking part in it and need help brainstorming lyrics I can use. Judges are looking out for entries that showcases uniquely-Singapore food in the lyrics. The competition will provide a single word as the theme, and I need to submit the lyrics.

#OBJECTIVE

Wait for me to provide a single word as the theme, then generate a song suitable for the National Day 2026 in Singapore.

#STYLE

Expert musician who specialises in writing and singing Singapore National Day songs

#TONE

Light-hearted and upbeat

#AUDIENCE

People of Singapore

#RESPONSE

<2 stanzas>

<1 chorus>

<1 stanzas>

<repeated chorus>

<final 1 stanza>

(Sang to the tune of XXX)

When Do We Need CO-STAR

- By using the **CO-STAR** framework, you can write prompts that gets you the output closer to what you want, faster.
- When you are building instructions for chatbots in future, adopting a proper framework like **CO-STAR** will help you better maintain and update them.
- You don't need to include every **CO-STAR** element in every prompt.
- Choose the ones that best fit your goals. With a bit of practice, combining these elements will help you craft stronger prompts and get better responses from AI.

“In-Prompt” Tasks

Summarise, Rewrite, Extract, Classify

Generation vs “In-Prompt” Tasks

Generation Tasks

Generate a short poem about birds

Birds glide lightly through the sky,
Wings spread wide as clouds drift by.
They greet the dawn with cheerful song,
A melody both clear and strong.

From branch to breeze they roam so free,
Above the hills, the fields, the sea.
A fleeting dance of feather and air,
A quiet beauty everywhere. 🐦

In-Prompt Tasks

Summarise what this poem means in one line:

Birds glide lightly through the sky,
Wings spread wide as clouds drift by.
They greet the dawn with cheerful song,
A melody both clear and strong.

From branch to breeze they roam so free,
Above the hills, the fields, the sea.
A fleeting dance of feather and air,
A quiet beauty everywhere. 🐦

The poem celebrates the **freedom, grace, and quiet beauty of birds** as they move effortlessly through nature. 🐦

4 “In-Prompt” Tasks That AI Can Do Well

Summarise

- Shortening your long text more succinctly
- Obtain key insights fast

Rewrite

- Proofreading and correcting grammar
- Enhancing your original text
- Translation

Extract

- Obtain key facts
- Remove irrelevant parts of the text

Classify

- Sort inputs into several categories
- Compare semantic meaning of text to several categories

Summarise

Simple examples of Summarisation:

- Summarise <long text> into:
 - ... a short paragraph
 - ... a table format with the key points
 - ... 10 bullet points

More **complex** examples of Summarisation:

- Summarise <long text> into:
 - ... 2 versions, one for XXX and one for YYY
 - ... key points supported by evidence / explanations / links
 - ... 5 revision flashcards in Q&A style

Advanced Ways To Summarise

Summarise the following story into 2 versions, one for a 5 year old boy and another for a University Professor studying the evolution of Children's Story:

The Three Little Pigs

Once upon a time, there were three little pigs who decided it was time to leave their mother's home and build houses of their own.

...

Version for a 5-Year-Old Boy

Three little pigs left home to build their own houses. One built a house of straw, another built a house of sticks, and the third built a strong house of bricks. A big bad wolf came and blew down the straw and stick houses, so the first two pigs ran to the brick house. The wolf could not blow the brick house down, and when he tried to come through the chimney, he got scared and ran away. The pigs stayed safe together in the strong house.

Version for a University Professor Studying the Evolution of Children's Stories

The Three Little Pigs is a classic cautionary folktale in which three pigs construct homes from progressively stronger materials—straw, sticks, and bricks. A predatory wolf destroys the first two poorly built houses but fails against the third pig's carefully constructed brick house, ultimately being outwitted and driven away. The narrative illustrates a didactic moral common in early children's literature: diligence, foresight, and industriousness provide protection against adversity.

Hands-on

Summarise Wikipedia Articles

Go to Wikipedia and search for any topic of interest.

Paste the text into ChatGPT and ask it to summarise it for you.

Try several variations of the Response (bullet points, table format, etc) to vary the output.

Rewrite

- Proofread the following and correct all spelling and grammatical mistakes...
- Rewrite this passage by adding a more professional tone...
- Translate the following into <language, e.g. Japanese>...
- Enhance the following by elaborating more about **XXX**...
- Rewrite the following to ELI5.

Note: ELI5 = Explain Like I'm Five; this is used to simplify the text

Hands-on

Rewrite Wikipedia Articles

Go to Wikipedia and search for any topic of interest.

Paste the text into ChatGPT and ask it to rewrite it in a way a 5 year old would understand.

Extract

Extract an Ingredient list from the following recipe:

Simple Chicken Soup Recipe

1. Place **500 g chicken (bone-in pieces or thighs)** and **1.5 litres water or chicken stock** into a pot and bring to a boil.
2. Add **1 chopped onion** and **2 minced garlic cloves**, then reduce the heat and simmer for about **15 minutes**.
3. Stir in **2 sliced carrots** and **2 cubed potatoes**, and continue simmering for **15–20 minutes** until the vegetables are tender and the chicken is fully cooked.
4. Season the soup with **salt and pepper to taste**, then sprinkle **chopped spring onion or parsley (optional)** before serving hot.

Ingredients

- 500 g chicken (bone-in pieces or thighs)
- 1.5 litres water or chicken stock
- 1 onion, chopped
- 2 garlic cloves, minced
- 2 carrots, sliced
- 2 potatoes, cubed
- Salt (to taste)
- Pepper (to taste)
- Spring onion or parsley, chopped (optional) 🍷

Hands-on

Extract key points from Wikipedia Articles

Go to Wikipedia and search for any topic of interest.

Paste the text into ChatGPT and ask it to extract key points of interest for you.

Classify

If you want to control the output of categories, you will need to specify the them.

Classify the following into these categories
[Positive, Neutral, Negative]

This movie is a waste of my time.

Category: Negative

I'm not sure what to say about this movie.

Category: Neutral

I would definitely rewatch the show.

Category: Positive

Building Chatbots

Letting others use the AI you built

Chatbots in ChatGPT are called GPTs

You can let the AI create your Chatbot for you

Create ← Configure

Hi! I'll help you build a new GPT. You can say something like, "make a creative who helps generate visuals for new products" or "make a software engineer who helps format my code."

What would you like to make?

Create a chatbot that always gives me a riddle to guess.

 Updating GPT...

The Create option lets the AI build your chatbot for you.

Prompt the AI what GPT you want to build

Great start! Now we need a name for this GPT.

My suggestion: **Riddle Challenger**

It's simple and clearly tells users they'll be challenged with riddles. Would you like to keep **Riddle Challenger**, or choose a different name?

The AI continues to brainstorm with you

 You can preview the GPT as it is being built

A GPT will be progressively built for you to test out

It even generates some conversation starters for you

You can

built

Give me a riddle

I speak without a mouth and hear without ears.
I have no body, but I come alive with wind.
What am I?

A rock

Not quite. A rock stays a little too quiet for this one.
Tiny hint: think of something that repeats what it receives.
What's your next guess?

Echo

Correct! Nicely done — that one bounced right back to you.

AI has helped to configure the GPT's settings

Create

Configure

Name

Riddle Challenger

Description

I challenge you with riddles and check your guesses.

Instructions

Riddle Challenger is a playful riddle master that always gives the user riddles to solve. Each interaction revolves around a guessing game. Whenever the user sends any message—including greetings or random comments—the GPT immediately presents a riddle without a greeting first. If the user proposes an answer, evaluate it and clearly say whether it is correct. If correct, briefly congratulate them in a playful tone and immediately present a new riddle. If incorrect, provide a very

A Chatbot for a book

Find a pdf of a storybook (if you can't find one, generate one!)

Create a chatbot that allows you to ask questions about the storybook. For example, if you upload the story of the **Three Little Pigs**, you can ask questions like *"How does the First Pig feel when his house of straw was blown away?"*

Generating A Website

First Step To An Interactive Site

HTML + CSS + JAVASCRIPT

- A basic website consists of 3 parts:
 - **HTML (Hyper Text Markup Language)** – the code to structure your website, and display UI elements
 - **CSS (Cascading Style Sheets)** – the code to beautify your website, and control the layouts and arrangements of the elements
 - **Javascript** – the code that adds interactivity to your website
- For this workshop, we'll focus on using the AI to generate all 3 parts into a single chunk of text, so you can easily see it on your local computer.

Generate A Simple Website

Generate a website that shows a simple calculator.
Output HTML, CSS and Javascript all in one HTML file.

```
<> HTML

<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-s
<title>Simple Calculator</title>

<style>
body {
  font-family: Arial, sans-serif;
  background: #f2f2f2;
  display: flex;
  justify-content: center;
  align-items: center;
  height: 100vh;
}
```

How do you find
the quality of the
generated
output?

Parts Of The Website Code

HTML Code

```
<div class="calculator">
  <input type="text" id="display" class="display" disabled>

  <div class="buttons">
    <button onclick="clearDisplay()" class="clear">C</button>
    <button onclick="append('/')" class="operator">/</button>
    <button onclick="append('*')" class="operator">*</button>

    <button onclick="append('7')">7</button>
    <button onclick="append('8')">8</button>
    <button onclick="append('9')">9</button>
    <button onclick="append('-')" class="operator">-</button>

    <button onclick="append('4')">4</button>
    <button onclick="append('5')">5</button>
    <button onclick="append('6')">6</button>
    <button onclick="append('+)" class="operator">+</button>

    <button onclick="append('1')">1</button>
    <button onclick="append('2')">2</button>
    <button onclick="append('3')">3</button>

    <button onclick="append('0')">0</button>
    <button onclick="append('.')">.</button>
    <button onclick="calculate()" class="equal">=</button>
  </div>
</div>
```

CSS Code

```
<style>
body {
  font-family: Arial, sans-serif;
  background: #f2f2f2;
  display: flex;
  justify-content: center;
  align-items: center;
  height: 100vh;
}

.calculator {
  background: #222;
  padding: 20px;
  border-radius: 12px;
  box-shadow: 0 0 10px rgba(0,0,0,0.3);
}
```

Javascript Code

```
<script>
let display = document.getElementById("display");

function append(value) {
  display.value += value;
}

function clearDisplay() {
  display.value = "";
}

function calculate() {
  try {
    display.value = eval(display.value);
  } catch {
    display.value = "Error";
  }
}
</script>
```

Tips For Prompting The AI In Building A Website

- Add a dark mode
- Use localStorage to store the user's preferences (useful when you have choices the user needs to make)
- Generate it in the style of Apple's website design
- Use the contents provided to generate the website
- Ensure it is mobile responsive (i.e. looks good on desktop view and mobile view)

Prompt:

"Generate a website about a new Phone Model launched by a company called "Durian" in the style of Apple websites. Output HTML, CSS and Javascript all in one HTML file.."

Durian Phone X

Smells powerful. Works even better.

[Learn more](#)

Designed to stand out.

The new Durian Phone X combines bold design with powerful performance. Inspired by premium product launches, built with Durian innovation.

Supercharged performance

A20 Durian Chip

Fast. Smooth. Extremely powerful.

108MP Camera

Capture every detail.

All-day battery

Lasts longer than your day.

Ultra Display

Bright. Sharp. Beautiful.

Hands-on

Generate A Website

Think of an idea for a simple website.

Write the prompt to generate it.

Save the output into a file called
website.html

Open this file with any web browser like
Chrome.

Using Canvas mode

You can also use the Canvas mode to generate an app or website.

It comes with an instant preview that will help you quickly test that things are working as intended.

Using Canvas mode

Generate a random boy / girl name generator.
Allow me to choose whether I'm looking for a boy's name
or a girl's name.
